

Green Initiative

Our ECO-FRIENDLY printing process utilizes alcohol-free fountain solutions, non-hazardous solvents, soy based inks and aqueous coating. This greatly reduces our VOCs. Currently we recycle over 35 tons of paper, card board & pallets.

We encourage designers to partner with us on projects that will likely be recycled. We can help designers on choosing chlorine-free paper, help reduce waste with cost efficient layouts and print with recycled materials.

Coming soon... Our 3 Acre Urban Forest!
